EDUCATION

Bhagat Phool Singh Mahila Vishwavidyalaya, Sonipat

Aug 2020 - May 2024

Bachelor in Technology: Computer Science – Percentage: 75%

Modern School, Faridabad

Higher Secondary Education, CBSE - Percentage: 81%

Apr 2019 - Apr 2020

Senior Secondary Education, CBSE - Percentage: 87.2%

Apr 2017 - Apr 2018

EXPERIENCE

Software Engineer

Jan 2025 – Present

Company: Coforge

- Supported backend development tasks using Java, including minor enhancements and assisting with API logic.
- Participated in functional and integration testing of REST APIs using Postman; documented test results and coordinated with QA team for issue tracking.
- Attended daily **Agile meetings** and gained exposure to the software development lifecycle, from coding to testing and basic deployment discussions.

Software Developer Intern

Aug 2024 – Dec 2024

Company: Destino

- Developed interactive and responsive user interfaces using React.js and modern JavaScript (ES6+). Built reusable components and implemented state management with React (e.g., using Redux, Context API).
- Integrated RESTful APIs and third-party services into front-end components. Designed and implemented RESTful APIs using Node.js and Express.js. Developed database models and handled data storage using MongoDB, MySQL, or PostgreSQL.
- Managed user authentication and authorization using tools like JWT or OAuth.

Java Developer Intern

Jun 2023 - Nov 2023

Company: S O InfoTech (P) Ltd.

- Got trained in an apprenticeship program under the guidance of manager and learned various core and advanced skills and implemented **memory-efficient** and **CPU-optimized** strategies utilizing **Data Structures Algorithms**.
- Developed **Product Crud Application** and implemented server side and client-side APIs for the application to enable end users to efficiently utilize the event functionality.

Full Stack Developer Intern

Apr 2023 - Jun 2023

Company: hireeasi

- Developed **server-side logic** and APIs using **Backend Technologies**, implemented responsive and user-friendly front-end interfaces using HTML, CSS and JS. Utilized Data-based management system using MYSQL/SQL to store and retrieved data for web applications. Actively sought opportunities for learning and self-improvement, staying up to date with future technologies and latest industry trends.

SKILLS

Technical Skills: Java, JPA, Spring, Python, HTML/CSS, MYSQL/ SQL, JavaScript, React, Hibernate, Java Swing, C/C++, Git, JSP, JPA, Servlet, REST API, Micro-services, XML, AWS, MongoDB, Angular, Automation, Selenium, Jira

Soft Skills : Creative Thinking, Management, Problem Solving, Multitasking, Communication, Auditing. Takes Initiative

Coursework : Data Structures and Algorithms, DBMS, Operating System, OOPS, Cloud Computing, CI/CD Concept

CERTIFICATIONS

- Java Full Stack React JS Training, Ducat Jul 2023 - Feb 2024
- Data analysis with Python, IBM Sept 2023
- Summer training on Python, STP Program Dec 2021 - Jan 2022

PERSONAL PROJECTS

- Online Food Ordering System:** Developed a robust online food ordering system using **Java, Spring Boot, JPA**, and **JSP, MySQL, REST API, JSON** for featuring **user authentication**, providing **end-to-end user experience**, including **menu browsing, order placement, and payment processing**, with **real-time order tracking** and **user account management**.
- Product Crud App:** Developed E-Commerce website enabling efficient **product management, user authentication**, and secure transactions for enhanced online shopping experience. Used **Java** and **MySQL** for database connectivity, **Spring Boot, HTML, CSS**. Designed and implemented **APIs** for efficient **CRUD operations** and reliable search page feature.
